Comment utiliser ce guide

Le Guide tarifaire des chargements partiels de Purolator a été préparé pour vous aider à calculer rapidement et facilement vos frais d'expédition pour les envois de fret au Canada. Les tarifs courants de Purolator sont calculés en fonction de votre ville d'origine, du poids facturable de votre envoi et de la ville de destination.

Suivez ces étapes simples pour calculer votre tarif d'expédition :

1. Trouvez la paire de villes d'origine et de destination dans le guide tarifaire pour l'envoi.
2. Consultez la section Comment calculer le poids facturable pour établir le poids total facturable de votre envoi en additionnant le poids de chaque palette et en arrondissant au nombre entier supérieur suivant (p. ex., un poids de 351,1 lb est arrondi à 352 lb).
3. Le tarif courant de votre envoi sera calculé en fonction du poids facturable et du taux par quintal, sous réserve du tarif minimum pour le corridor. Veuillez vous reporter à la section Comment calculer les frais d'expédition des chargements partiels.
4. Une fois que vous avez calculé vos frais d'expédition, passez à la section intitulée Services spéciaux des chargements partiels (services à valeur ajoutée et services accessoires) pour choisir parmi nos options de service additionnelles celles nécessaires pour répondre à vos besoins d'expédition.
5. Vous êtes maintenant prêt à expédier votre envoi avec Purolator. Vous pouvez choisir d'expédier en ligne sur le site purolator.com (EEL) et au moyen de Purolator Expédition électronique – Serveur ou de communiquer avec nous par clavardage en direct sur le site purolator.com ou par téléphone, au 1 888 SHIP-123 pour planifier une cueillette.

Les tarifs, les suppléments et les autres frais peuvent être modifiés sans préavis.

Veuillez noter que les Modalités et conditions de service de Purolator, disponibles sur le site purolator.com, prévaudront en cas d'incohérence entre le présent document et les [Modalités et conditions de service de Purolator](#).

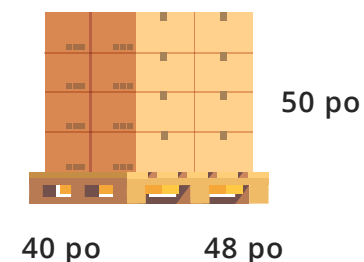

Comment calculer le poids facturable

Le poids facturable d'un chargement partiel est calculé en fonction du poids le plus élevé entre son poids réel ou son poids dimensionnel (cubé).
Le poids dimensionnel est calculé comme suit :

1. Calculez le volume en pieds cubiques de l'envoi.

Longueur x largeur x hauteur (en pouces) / 1 728

Exemple : Une palette mesurant 48 po (longueur) x 40 po (largeur) x 50 po (hauteur) a un volume de 55,56 pieds cubes.

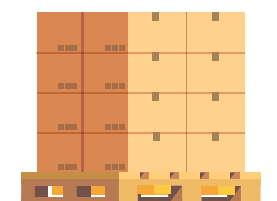

$$\frac{48 \times 40 \times 50}{1728} = 55,56 \text{ pieds cubes}$$

2. Multipliez le nombre de pieds cubes par le facteur de cubage (densité).

Le facteur de cubage (livres par pied cube) pour le FAC (Fret tous genres) est de 10.

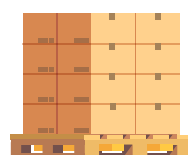

Exemple : La palette ci-dessus a un volume de 55,56 pieds cubes qui doit être multiplié par le facteur de cubage de 10 = 555,6 lb, arrondi à 556 lb.

$$55,56 \times 10 = 556 \text{ lb}$$

3. Un poids dimensionnel (cubé) de 1 000 lb par pied linéaire est imposé aux envois qui occupent 10 pieds ou plus d'espace dans la remorque.

Exemples de poids facturable :

Exemple 1

Poids réel : 450 lb

Poids dimensionnel : 556 lb

Poids facturable : 556 lb

(le poids le plus élevé entre le poids réel ou le poids dimensionnel)

Exemple 2

Poids réel : 621 lb

Poids dimensionnel : 556 lb

Poids facturable : 621 lb

(le poids le plus élevé entre le poids réel ou le poids dimensionnel)

Exemple 3

Poids réel : 8 000 lb

Poids dimensionnel : 8 534 lb

Espace occupé dans la remorque
en pieds linéaires : 16 pieds

Poids facturable : 16 000 lb

(le poids le plus élevé entre le poids réel ou le poids dimensionnel)

Veuillez vous reporter aux Modalités et conditions de service pour lire les dispositions relatives à la politique d'acceptation des envois, au repesage, au cubage et aux envois de faible densité.

Comment calculer les frais d'expédition des chargements partiels

Étape 1 :

Déterminez le poids facturable de votre envoi. Il s'agit du poids le plus élevé entre le poids réel, le poids dimensionnel ou le poids fondé sur la mesure en pieds linéaires. Veuillez vous reporter à la section Comment calculer le poids facturable ci-dessus pour obtenir plus de renseignements.

Étape 2 :

Trouvez la paire de villes d'origine et de destination dans le tableau tarifaire et les tarifs correspondants pour le corridor. L'exemple ci-dessous a pour origine « TORONTO, ON » et la destination « VANCOUVER, BC » et sera utilisé pour calculer les frais d'expédition du chargement partiel dans divers scénarios :

Origine - Toronto, ON

Tarifs préférentiels pour les chargements partiels – Service Accéléré

Destination	PV	MIN	LTL	500	1000	2000	5000	10000
VANCOUVER	BC	\$172.00	89.50	81.18	75.47	68.49	61.18	54.11

Tous les frais d'expédition sont assujettis aux suppléments pour carburant des envois de chargement partiel, aux frais de service à valeur ajoutée, aux frais administratifs et aux taxes applicables conformément aux Modalités et conditions de service de Purolator.

Comment calculer les frais d'expédition des chargements partiels

Scénario 1 : Frais minimums

Par frais minimums on entend le montant minimum qui sera facturé pour les envois si le taux par quintal calculé (par 100 lb) est inférieur à celui-ci.

Exemple : Un envoi ayant un poids nominal de 150 lb coûterait $89,50 \$ \times 150/100$, c.-à-d. 134,25 \$ à un tarif par tranche de poids quintal, ce qui est inférieur au tarif minimum. Dans cet exemple, les frais minimums de 172,00 \$ seraient facturés.

Scénario 2 : Taux par quintal – Poids nominal

Le taux par quintal est facturé lorsque les frais facturables calculés sont plus élevés que les frais minimums pour le corridor, en fonction du poids le plus élevé entre le poids réel et le poids dimensionnel de l'envoi.

Exemple : Un envoi au poids nominal de 600 lb coûterait $81,18 \$ \times 600/100$, c.-à-d. 487,08 \$ avec le tarif par tranche de poids quintal des envois de plus de 500 lb.

Scénario 3 : Taux par quintal – Poids nominal ajusté

Le poids nominal de l'envoi est ajusté afin d'obtenir un tarif par tranche de poids quintal moins élevé.

Exemple : Un envoi ayant un poids nominal de 490 lb coûterait 438,55 \$ au tarif par tranche de poids quintal habituel des chargements partiels. Toutefois, en augmentant le poids de 10 lb pour atteindre le tarif par tranche de quintal des envois de 500 lb et plus, le montant de 405,90 \$ qui est inférieur de 32,65 \$, peut être facturé.

Scénario 4 : Taux par quintal – Envois calculés en pieds linéaires

Les envois qui occupent 10 pieds linéaires ou plus d'espace dans la remorque se verront attribuer le poids le plus élevé entre 1 000 lb par pied linéaire, le poids dimensionnel ou le poids réel de l'envoi.

Exemple : Un envoi composé de six palettes qui ne peuvent être empilées a un poids nominal de 12 000 lb et un tarif par tranche de poids quintal pour les chargements de 10 000 lb de 54,11 \$; il coûterait donc 6493,20 \$.

Tous les frais d'expédition sont assujettis aux suppléments pour carburant des envois de chargement partiel, aux frais de service à valeur ajoutée, aux frais administratifs et aux taxes applicables conformément aux Modalités et conditions de service de Purolator.

Règles et conditions

Tarifs en vigueur au 1^{er} Janvier 2025

- Tous les tarifs sont calculés par 100 lb (quintal), à l'exception des frais MIN (minimum) pour le corridor d'expédition.
 - Tous les tarifs sont fondés sur un envoi cubé d'une densité minimum de 10 (lb/pi³) occupant jusqu'à 10 pieds d'espace de remorque. Les envois qui occupent 10 pieds linéaires ou plus d'espace dans la remorque se voient imposer un poids cubé de 1 000 lb par pied linéaire. Le poids facturable de l'envoi sera plus élevé que son poids réel ou son poids cubé.
 - Tous les envois sont assujettis au supplément pour carburant applicable conformément aux Modalités et conditions de service de Purolator.
 - Les services additionnels (services à valeur ajoutée) requis à la cueillette ou à la livraison de l'envoi seront facturés conformément au tarif des services à valeur ajoutée pour les chargements partiels de Purolator.
 - Les tarifs s'appliquent au service LTL Accéléré de Purolator.
 - Pour les points d'origine et de destination qui ne sont pas précisés dans un tableau tarifaire de l'entente, une réduction de 60 % s'appliquera au tarif de transport d'un chargement partiel de Purolator pour la classe de fret correspondant à ce tableau tarifaire, publié par SMC3*. La réduction ne s'applique pas au tarif minimum pour le corridor.
- * Un abonnement payé de SMC3, Inc. donne accès aux données tarifaires. Veuillez communiquer avec votre représentant des ventes pour obtenir des précisions sur la façon d'obtenir ces renseignements auprès de SMC3, Inc.*
- Une hauteur ou une largeur de 8 pieds (96 pouces) sera attribuée à un envoi de fret qui ne peut être empilé ou qui mesure 5 pieds (60 pouces) ou plus, ou qui ne peut être placé à côté d'un autre envoi de fret dans la remorque.
 - Tout devis pour un envoi est uniquement une estimation et est basé seulement sur les renseignements fournis par le client. Le tarif du service et les frais additionnels réels qui seront facturés pour un envoi à un client peuvent être différents de ceux indiqués sur le devis en fonction des caractéristiques de l'envoi réellement confié à Purolator.
 - Purolator se réserve le droit de modifier, de suspendre ou d'annuler les tarifs préférentiels pour le transport de chargements partiels, le tarif des services à valeur ajoutée et les frais de service supplémentaires et administratifs, à son entière discrétion, en tout temps et sans préavis.
 - Les tarifs et les services sont assujettis aux Modalités et conditions de service de Purolator.
